Note that some districts have schools that are both eligible and not. That could be a good comparison. If there are similar schools in the same district one with and one without EEMs then we have a good comparison.

Lets check for installations against this list. Because the EEM data file has a school code and not a district code, I need to merge that in.

```
Eligible %>%
  select( District.ID, District.Name, SB.1149.Eligibility ) %>%
  unique() %>%
  group_by( District.ID, District.Name ) %>%
  count() %>%
  filter(n > 1) -> BorderDistrict

inner_join(Eligible, BorderDistrict) -> BorderSchools

## Joining, by = c("District.ID", "District.Name")

inner_join(BorderSchools, EEMs, by = c("School.ID" = "FacilityODEId")) -> BorderEEM

BorderEEM
```

District Demographics

The files are so different from year to year. This is going to be fun. This would be so much easier if the ODE people understood some statistics.
